

How this image was created in Affinity Photo

This is the original image to which I added the following adjustments.

<u>Levels</u>: Black 5% Gamma: 1.2

<u>Unsharp mask:</u> Rad. 3.7px Factor. 2

Clarity: 40%

Next I opened this free Texture Image (from an old Digital Photo magazine) copied it and then pasted it onto the Fallen Leaves layer, resizing and repositioning it to suit.

I left the Blend mode at Normal and the opacity at 100%

Opacity: 100 % 🔻 Normal	: • (
Texture 2 (Pixel)	
Texture 1 (Pixel)	
Background (Pixel)	Z

I then opened this second Texture Image and repeated the process, again copying and then pasting onto the Fallen Leaves layer,

I left the Blend mode at Normal but reduced the opacity of this layer to 25%

Now I dragged the Fallen Leaves layer to the top of the stack and changed the blend mode to "Overlay" and Opacity at 100%. Finally I flattened and exported.
